## 15 Horne St, St Charles

The interior of this nine-year-old house is elegant but, at the same time, makes for a relaxed and convenient lifestyle. Each area of the light-filled "great room" has a specific use: cozy seating around the fireplace, a full-sized dining area, the permanent card table space and a music corner showcasing the grand piano.

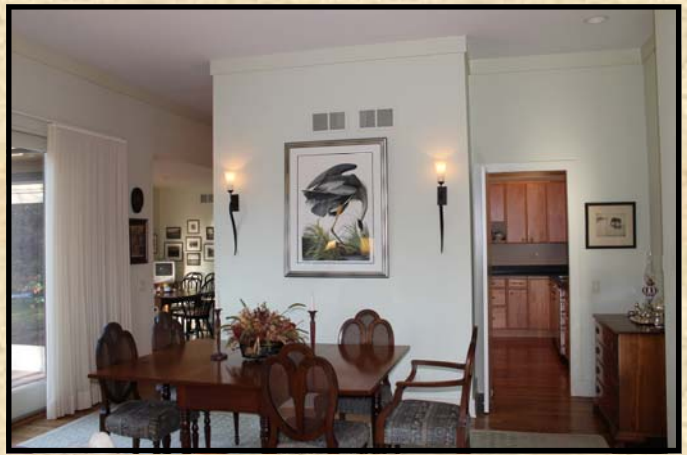

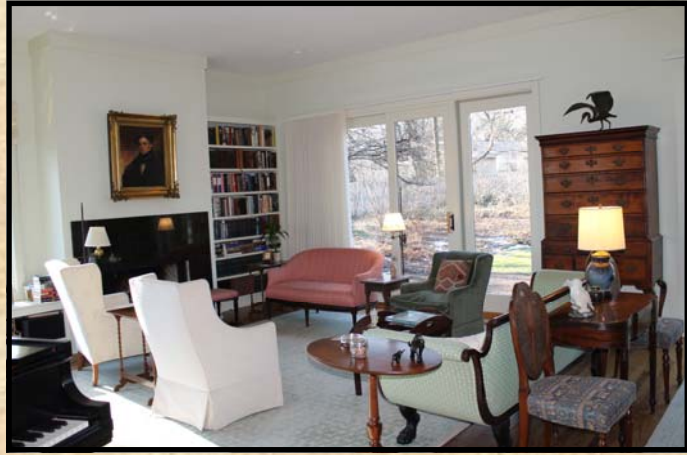

Glass sliders allow easy access to walk or sit in the seasonal gardens and many built-in shelves furnish space for books and for displaying works of art..

Both the eating area in the kitchen and the master bedroom, with its spacious walk-in closet and bathroom having a separate shower in addition to the tub, open to the screened porch. The kitchen, a gourmet's delight, has upgrades such as the downdraft cooktop in the center island, double ovens and handsome maple cabinetry.

The study, next to the large foyer and guest suite stairs, could be a third bedroom. The oversized mudroom, with multiple closets and much shelving, adjoins the laundry room and garage. Other features include lever hardware, hardwood floors and ample storage in this carefully planned custom home.
